

IST114W : Linux Essentials

Linux Essentials covers the material in CompTIA's Linux+ and helps students prepare for certification. Using TestOut's industry leading training, simulation, and assessment package, it offers in-depth exposure to the competencies required of an early-career systems administrator supporting Linux systems. Students learn system management skills such as configuring and managing software, as well as storage, processes, and services. This course also covers in detail containers, automation, shell and BASH scripting, and best practices for security in the Linux environment.
