

# **IST125W : Introduction to Programming**

Introduction to Programming introduces students to an object-oriented programming language with an emphasis on hands-on coding exercises that explore and apply the fundamentals of code writing. Students learn the fundamentals of programming such as variables, functions, data types, control structures, and object-oriented programming. Overall, this course provides a solid foundation in programming concepts and skills that can be applied to further study in computer science or related fields.

**Lecture Hours** 3

**Lab Hours** 2 **Credits** 4
